4. ENTRIES

4.1 Closing date for entries

See the programme in chronological order (point 3) and SPR Art. 23.

4.2 Entry procedure

4.2.1 Registration shall be carried out online at www.pamk.cz. The time of the entry form entering in the system and the date of the entry fee payment are decisive data.

Details regarding co-driver can be delivered additionally up to completion of the administrative check. Foreign participants have to submit agreement of their ASN (Art. 3.9.4 ISC)

4.2.2 The entry form will be accepted after the full amount of entry fee has been credited to the organizer's bank account by the closing date of entry. Exceptionally, the organizer may accept the entry form before the payment of entry fee. The entry fee payment after the closing date of entry, though, is only possible on the prior agreement with the organizer, and it is always subject to the fee increased by 25 %. In such a case, the competitor is obliged to pay the fee by the time of the itinerary handover at the latest.

4.2.3 Confirmation about acceptance of entry form will be sent via an e-mail.

4.3 Number of accepted entrants and classes

4.3.1 The Maximum Number of accepted entrants is fixed at 150.

5. INSURANCE

5.1 Insurance Coverage of the Organizer

5.1.1 The Autoclub ČR has made the general insurance contract No. C550012623 with Allianz pojišťovna, a. s. via the Company PLATINUM Consulting s.r.o. covering the organizer's liability for damage caused to the third party during the competition up to CZK 50,000,000 per event.

5.1.2 The part of the insurance agreement is the coverage for cars against the damage caused to third party up to CZK 50 000 000 per participant. However, the damage caused by drivers among themselves is not covered by this contract. The organizer binds self to arrange this insurance contract for all competitors except those, who will show the long-term liability insurance covering damages caused on closed route. The drivers and competitors cannot be mutually considered to be a third party.

The insurance for organizers and participants is made with an integral excess of CZK 5 000. It means that damage up to CZK 5 000 won't be refunded and damage over CZK 5 000 will be covered without the complicity of insured.

5.1.3 All crews at administrative check have to present valid International motor insurance card for their car. Without this card the crew won't be allowed to start.

5.2 Insurance Coverage for the competitors and crews

All drivers and co-drivers are obliged to arrange their own personal accident insurance. The personal insurance card should be presented on request at administrative check (not valid for the owners of the AS ACCR license). Insurance must cover costs of possible medical treatment in the Czech Republic starting from Shakedown until Parc fermé after finish of the rally.

5.3 Damage reporting

The crews are obliged to notify the organizer about any damage caused on the track by their car by the end of event at the latest. Violation of this duty stands for summoning the competitor and involved crew to a disciplinary committee.

5.4 Insurance Coverage Exclusions

Auxiliary vehicles, cars dedicated to reconnaissance rides and vehicles with special labels issued by the organiser are not covered by provided rally insurance (with the exception of insured organiser's cars) and those are always going on their own responsibility.

6. ADVERTISING AND IDENTIFICATION

6.1 Obligatory advertising

Place: Horažďovice, Mírové náměstí

Date: 19.09.2025 Time: 19:30 – 21:00

Only those invited crews take part which receive an invitation including the estimated time.

12.2.1 Start of the rally

The crews with their vehicles will arrive at the starting ramp at the time specified in the starting list. The official start, according to the starting list, will take place as follows on the starting ramp:

- 5 seconds prior to the start, the starter shall raise the flag to a horizontal position. At the precise moment of the start, the starter shall swing the flag upwards.

12.3 Permitted early check-in

Early check-in is allowed in TC8A, 8B, 8C, 14A, 14B, 14C.

12.4 Start of Special Stages

The start will be given by an electronic digital countdown system placed at the SS start in the driver's view and connected to a photocell for detecting early starts. The photocell is placed about 50 cm after the starting line in the height of 0.5 m (-/+ 50 cm). The start is fixed, and the car has to be positioned in the way that its foremost part is on the level of the start line.

Starting procedure:

if the light signalization with digital time countdown is used:

39 sec. - red light switches on

30 sec. - the starter points at the starting countdown system

10 sec. - red light blinks on

0 - Start - green light switches on

Moving a part of the barrier means that it moves out of the painted base (circle).

Rolling over a bale is considered a move outside the base.

In case of any dispute, the sport stewards shall decide.

12.5.2 Shortening the route

For the shortening of the route is considered:

- Drive around an anti-cut barrier in different way than through SS.
- Intentional shortening of the route with all four wheels outside the road.
- The crew can be excluded by the Stewards for shortening of the SS.

12.5.3 Half-Circuit Special Stage

12.5.3.1 In circuit part of the SS the same part is taken several times according to the road book. After start to the SS the crew passes the prescribed number of laps according to the road book. Laps are counted by the crew. After circuit part continues standard SS to the flying finish according to the road book. The organizer recommends the crew to prepare the pacenotes for all laps, so that the number of passed laps is correct.

12.5.3.2 The crew, which does not pass the prescribed number of laps, will be penalised according to Art. 12.5.3.5. If the number of laps is exceeded, the real time will be counted to the crew and it will be reported to the stewards.

12.5.3.3 Start of the half-circuit SS 1/3, SS 9/12 a SS 11/14

After arrival at the start, the time of the supposed start in the SS will be put in the timecard, which is the beginning of the driving time to the next TC. The start in the SS will be directed by the timekeeper regarding the safety of the crews.

The crew will start on command of the timekeeper when the route is free.

The exact moment of start is measured by the start detection device.

If the start is done in the expected starting interval (approx. 1 minute), the timekeeper will show a board with number 5, 5 seconds before green light appears on a semaphore.

In case of longer delay than expected, timekeeper will show the board with a sign STOP and then show again the board with number 5 approx. 5 seconds before green light appears on the semaphore. tabulku s číslem 5.

The arrival at the start of half-circuit SS 1/3 will be conducted through the crossing of the route of SS 1/3. Before you reach the crossing, there will be located TC 1/3. Crossing the route of SS 1/3 will be allowed by a traffic light. The maximum speed allowed between TC 1/3 and the start of SS 1/3 is 30 km/h (will be designated in the roadbook). It is also strictly prohibited to warm up the tyres there, it will be controlled by the monitoring ONI® Systém.

12.5.3.4 Start at the red light is prohibited! The crew will be reported to the stewards.

12.5.3.5. Penalisation for the crews, which does not pass the prescribed number of laps.

Drivers' safety equipment card

During scrutineering, the competitor shall submit details of the driver's and co-driver's safety equipment. The card with the safety equipment details is filled in via the IS Autoklub ČR system and will be provided to the crew upon receipt of the itinerary along with the technical card.

MONITORING GPS SYSTEM ONI®

1. Generally

All competition cars have to be obligatorily equipped with the ONI® tracking system. ONI® tracking system is owned by the Autoclub of the Czech Republic and will be rented to the competitors (for non-refundable fee 160 CZK (included in the entry fee) or 530 CZK for the whole set (paid by the competitor) unless the competitor has bought the basic earlier. The price of the set is 1320 CZK. Possible destruction, non-return or damage of the unit has to be paid for by the competitor to the provider in accordance with the applicable price list. In case of non-returning GPS tracking system immediately after the event, the fine 3000 CZK will be imposed to the competitor. Until the set is returned, the crew will not be enabled to start in the following competitions. Contact for retuning: 722 734 127

2. Distribution of the ONI® tracking system

Monitoring system ONI® consists of:

- tracking unit with display
- tracking unit holder
- power supply cable
- combined antenna roof
- control panel containing:
 - OK button to cancel the alarm / confirm red flag
 - SOS switch for calling emergency

ONI® tracking system will be installed to every rally car before each event. Detailed information will be published no later than during administrative checks.

After arrival in the scrutineering, device administrator will install the tracking unit, antenna and control panel. Antenna and power supply cables can be purchased by the crew for personal ownership. At the end of the rally or after retirement, the tracking unit or complete tracking system must be returned to the device administrator. Usually the devices are collected in the last service area or before finish of the rally.

3. Installation of the unit in the car

3.1 To fit the tracking unit with display, antenna and control panel, it is necessary for the competitor to follow exactly the Installation guide, to keep the unit in good condition and to protect it against damage and fouling (especially the connectors) during the time.

3.2 For foreign and one-time rally participants, the rental equipment is equipped with a magnetic roof antenna and control elements placed in a single unit. Competitors must choose a suitable location within reach of both crew members and prepare a mounting solution for securing the unit.

4. The unit operation during rally

To operate the unit, the crews have to meet all instructions as mentioned in the User's guide.

Operation during events on SS:

• Accident (crash detection)

- The unit evaluates the situation and sends info about accident to rally control. Crew cannot affect this message.
- The display shows message: **Are you OK?** Confirm.
- 10 s after this question, the siren wails for another 15 s
- If the crew pushes **OK** button, this information is sent to rally control and information about accident is not sent to the unit of following cars in the stage.

• Stop on SS

- When the car stops on SS, it is counted as an obstacle. Unit signals to the crew by sound siren and text, that they have stopped. This signal takes 15 s.
- If the crew doesn't push OK, a warning message is sent to the rally control and also to other cars, which are currently on the stage arriving to the obstacle.

- With pushing the OK button the crew confirms that they are okay, on the display there is shown the message OK and information about the obstacle is not sent to the unit of the next cars on the stage.

• **Calling for Assistance**

Switching the SOS switch is confirmed by a message on the display. At the same time, the unit will start emitting an audible signal.

The audible signal can be cancelled by pressing the confirmation button once

• **Red flag**

- When the rally control hangs out the red flag, the display shows big message RED FLAG (with red background) and the siren sounds.

- Crew has obligation to confirm receiving the red flag by pushing the OK button and to reduce the speed according to the sporting regulations.

- The siren sound can be cancelled by pushing OK button.

- The red flag on display can be cancelled only by rally control.

5. Speed checking during reconnaissance

During reconnaissance, the crew is obliged to follow traffic rules of the Czech Republic. Not respecting these rules, especially exceeding the speed limits, will be monitored via ONI® tracking system. This checking doesn't exclude other checks, i.e. police controls according to their standard procedures.

ONI® tracking system for reconnaissance

Tracking system is checking the speed in every moment during the reconnaissance.

Every crew will pick up the ONI® recce tracking unit together with roadbook. Installation of the unit and its using during reconnaissance is obligatory for all crews during the whole schedule of reconnaissance according to the art. 3 Reconnaissance schedule. For speed checking during the reconnaissance, NCL 21 units are used.

NCL21 unit is started automatically on the announced day and time at the beginning of the reconnaissance. It is set so that it works on the batteries for 24 hours if the unit moves and for 80 hours if it does not.

Checking the location is started by shakes of the unit. The location is checked every 10 seconds and is sent to the app every single minute. It is not necessary to plug the unit to any power supply. It is possible to place the unit on metal surfaces - magnets are implemented in the unit.

Not using the unit in a rally car will be fined.

Every attempt to falsify, manipulate or infringe the unit for reconnaissance or any device, which will make impossible to collect data because of external interference will be reported to the stewards who can penalize the crew up to refusing the start.

Decision regarding seriousness of the offence and its repeating is in Clerk of the Course's authority. For exceeding the speed limit, sanctions can be given according to supplementary regulations – 20.2.

RALLY LEGEND

7.1 Origin of the vehicle

Original historical competition vehicle: these are real legends (original vehicles), representing the brand and the time, which comply with the technical and safety regulations of the time (current at the time), while the emphasis is placed on the quality (rate of wear) of the car's safety equipment. Safety equipment must correspond to min. safety ten for Rally Legend.

Replica: this is a vehicle identical in appearance to the historical model, corresponding to homologation. Safety equipment must correspond to min. safety ten for Rally Legend.

When building a replica for the Rally Legend, the color scheme of the bodywork must correspond to the period or factory design.

7.2.1 Ten safety rules for demonstration drives

The ten safety rules for Rally legends are given in the NTP for HA in the "Rally" Standard Propositions.

7.2.2. Crew safety equipment

The crew/driver must use protective helmets on the closed section of the rally or during ZAV at least according to the passed Standard FIA, SFI, SNELL, overalls and boots min. specification ISO 6940. For safety equipment, it is strongly recommended to use equipment with (even passed) FIA homologation. The crew/rider is not obliged to fill in the BVJ card, but the equipment is still subject to inspection and approval by the technical stewards.

7.3 Starting numbers

A square format will be used for start numbers on the front door for RL - see 3.7.5 part of the number will also be marked with the letter L, half the size of the number.

7.4 Driving on SS

The goal of Rally Legend is to showcase vehicles to the public. The time and method of crossing the SS may not be measured or otherwise assessed. Rally Legend is not to be confused with Drift events. When driving on the SS route, the crew may not perform skid circles. A crew which, during their participation, does not observe the rules of Rally Legend and preserve the principles of demonstration driving, and with their behaviour or driving style endangers their own safety or the safety of other participants (e.g. an accident on the RZ track), will be terminated by the rally director from participating in the event and will be refused participation in the other two Rally Legends events.

7.5 Rally Legend discussion

Before the start of the event, there will be a discussion with the drivers. During this discussion, the rules and ways of driving on the SS track during Rally Legend will be introduced to the drivers. A driver who violates the provisions of this article will be denied further participation in the event. Participation in the discussion is mandatory for crews.
